

Star Stories

60-minute Program * Grades 1 & 2

Social Studies Standards: 1.C.1; 2.C.1 Science Standards: 1.E.1

ENJOY INTERACTIVE STAR STORIES INSIDE A PORTABLE PLANETARIUM!

Students investigate science, as well as cultures and traditions from around the world through star-inspired stories, myths and legends.

We've gone digital! The Museum planetarium programs now utilize advanced digital-dome technology to excite and engage students. Our new digital projection system is significantly more powerful and has greater capabilities, offering exciting visual experiences and in-depth exploration. The new planetarium is also easier to access (ADA accessible).

PROGRAM ACTIVITIES INCLUDE:

MYTHS AND LEGENDS

Explore constellation myths and legends from ancient Greek, Native American, Chinese and African cultures.

SHAPES, ANIMALS, PEOPLE AND PATTERNS

Identify, compare and contrast features of star pictures across cultures.

MARVELOUS MOON

Listen to a story about the moon from indigenous peoples of northern Mexico and observe how the moon appears to change shape from day to day.

CONSTELLATION CREATION

Create a constellation to take home and imagine your own star story.

***NOTE** Program set up requires a clear area 24x24 feet, ceiling height of 11 feet, and access to an electrical outlet.
